prosciento | The Metabolic Continuum CRO

CONTRACT RESEARCH ORGANIZATION (CRO)

End-to-End Clinical Development Across the Metabolic Continuum

See the Connection. Advance the Science.

Clinical & Regulatory Development | **Clinical Operations & Study Management** | **Patient & Site Services** | **Therapeutic Expertise**

ProSciento delivers fully integrated clinical development solutions across the metabolic continuum, combining deep scientific expertise, operational rigor, and direct access to precisely characterized patient populations. From first-in-human studies through pivotal development, we help sponsors advance programs faster and with greater confidence.

Clinical & Regulatory Development Capabilities

- Target product profiles and clinical development planning
- Study design and inclusion/exclusion (I/E) modeling
- Protocol and study design development
- Study optimization consulting
- U.S. and EU regulatory strategies and management
- Scientific advisory board management
- Medical writing
- Scientific presentations and abstract submissions

Clinical Operations & Study Management Capabilities

- Project management
- Feasibility and site selection
- Study start-up and site activation
- Clinical monitoring
- Medical monitoring
- Safety management and pharmacovigilance
- Biostatistics and statistical programming
- Vendor and site management
- Data management and EDC
- Quality assurance

Patient & Site Services Capabilities

- **PRO PASS™** - providing access to deeply characterized metabolic populations for faster feasibility, recruitment, and enrollment decisions
- Study-specific participant recruiting and retention planning
- Feasibility modeling and site identification
- Direct participant engagement throughout the study
- Pre-identified sites with focused metabolic disease expertise
- Ongoing site relationship management
- Participant concierge services

Proven Track Record

- **450+** metabolic clinical trials completed
- **10,000+** study participants enrolled
- Supported clinical development of **20** therapeutics in market
- **94.8%** participant retention in select studies

Deep experience across the metabolic continuum

- Obesity & Weight Management
- Type 1 & Type 2 Diabetes
- MASLD/MASH
- Cardiometabolic Disease
- Chronic Kidney Disease
- Adjacent Metabolic Indications

Let's advance your metabolic development program.
